LiquidMetric definitions:

- **Spreads** measure the bid to offer spread of the best visible orders in the book. The result is averaged over the stocks in the index and is based on measurements of the order book every 30 seconds. The value for the spread is quoted in basis points (0.01%).
- **Market depth** measures the amount of visible liquidity (bids and offers) in the order book within 10 and 50 BPS of mid price. The result is averaged over the stocks in the index and is based on measurements of the order book every 30 seconds. This is quoted in '000s of EUR.
- **Best Price %** measures how often each venue posts an absolute best price (no ties) for stocks. The result is averaged over the stocks in the index and is based on measurements of the order book every 5 seconds.
